### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

In light of applicants' response the rejection under 35 USC 112 has been withdrawn. The language, a compound containing an unsubstituted NH<sub>2</sub> group capable of reacting with acetaldehyde under distillation conditions, in the claims is sufficiently enabling in light of US 4,369,096 (US equivalent to EP 004019), which defines and lists a long list of such compounds, along with the support set forth on page 7 of applicants' specification and Morrison & Boyd 3<sup>rd</sup> ed. Page 177.

Upon reconsideration in light of applicants' response the rejection under 35 USC 103 has been withdrawn. Neither Rueter et al WO 99/11639 nor Robeson et al US 2,622,060 have a step introducing a compound containing an unsubstituted NH<sub>2</sub> group capable of reacting with acetaldehyde under the distillation conditions recited in applicants' claims. Seifert EP 004,019 does not overcome this deficiency and teaches away from the claimed invention by employing an alternative to the distillation process claimed. There would be no reason to modify the references to obtain the claimed process.

Accordingly, claims 1-20 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled  
“Comments on Statement of Reasons for Allowance.”
